

POL ALCOVERRO

SOFTWARE ENGINEER

Barcelona, Spain | polalcoverros@gmail.com | www.polalco.com

Software Engineer with hands-on experience building and maintaining full-stack business and industrial applications. Skilled in Vue.js, ASP.NET Core, FastAPI, SQL Server and Docker, with experience in REST APIs, real-time integrations, authentication, testing and AI-powered automation.

AREA OF EXPERTISE

Frontend Development	Database Management	Web Performance & Scalability
Backend Development	AI Integration & Automation	Responsive & Accessible Design

PERSONAL PROJECTS

- GradeTracker. Built a full-stack TypeScript app (Next.js + Firebase) for students to track subjects, assignments and grades, with an AI-powered chatbot for academic planning.
- BusosPenedes. Developed a TypeScript web app to manage and display public transport information for the Penedes region through an accessible, user-friendly interface.

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Mafrica S.A. (Cardona, Spain)	May 2026 - Aug 2026
- Built from scratch an internal support and knowledge management platform using Vue 3, Quasar, FastAPI, SQL Server and Docker, including authentication, real-time notifications, external integrations, monitoring and security features. - Maintained and enhanced industrial applications built with Vue/Quasar and ASP.NET Core/C#, integrating REST APIs, WebSockets, Node-RED, SQL Server, scales, barcode readers and printing systems.	
Frontend Developer, Opsmonitor (California, USA) (Remote)	Feb 2026 - Apr 2026
- Developed the infrastructure and core components for a new web application to optimize processes in a U.S.-based logistics company, building a scalable and maintainable frontend using React. - Gained hands-on experience with AI tools and agentic systems, leveraging them to improve efficiency and automate workflows.	
Intern Full-Stack Developer, ESSI - UPC (Barcelona, Spain)	Sep 2025 - Jan 2026
Implemented and customized a full Docker-based deployment of Taiga, including backend, frontend and async services, adapting the platform for project tracking in software engineering courses.	
Intern Full-Stack Developer, GooApps (Barcelona, Spain)	Mar 2025 - Jul 2025
Developed and maintained mobile applications using React and contributed to CRM systems built with Angular.	

EDUCATION

BSc in Computer Engineering - Software Engineering	Sept 2021 - Jan 2026
Universitat Politècnica de Catalunya (UPC) - FIB	
Thesis: "Adaptation and Extension of the Taiga Tool for Project Tracking in Software Engineering Courses"
